Time Collection Options

Gather employee time via hardware, software, telephone and/or smartphone - choose just one or as many different collection methods as you need to accommodate your organization's requirements. Whether you need keypad entry, swipe card readers, door access, proximity readers, biometric (finger scan verification) scanners or labor costing features—there is a clock to get the job done.
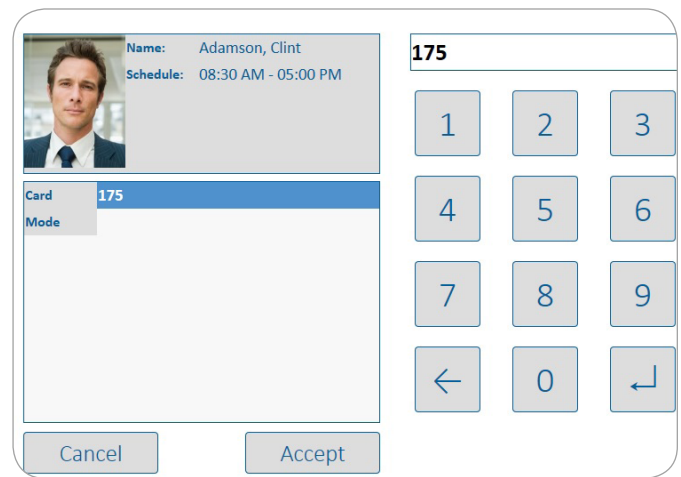

Employee Self-service

Employees can input time directly from their desktop using iSolved TimeForce with Self-service. Employees have access to MyScreen where they can view accrual balances and request time off.

Net TimeClock

Net TimeClock provides a simple and easy interface for employees to clock in and out through a PC interface. With Net TimeClock, you can easily set up a terminal or kiosk for employees to clock in.

iSolved Mobile

iSolved Mobile is the solution for employees who are on-the-go. With a simple, easy-to-use interface that is immediately familiar to all smartphone users, employees can clock in wherever they are.

Employees can clock in individually, or crew leaders can clock in an entire group of employees. Either way, there is no need to worry about being out of cell service - iSolved Mobile offers true offline capability.

Hardware Time Collection

NXG G2 TimeClock

The NXG G2 user interface and touch screen will engage employees, shorten the learning curve and reduce data input errors. It supports all badge formats (bar code, magnetic or proximity), has two USB ports and ethernet connectivity and was designed specifically to integrate seamlessly with iSolved TimeForce!

NXG G2

V800 & V850 Biometric TimeClock

No cards to carry or lose. Our fast, award-winning clocks in our Velocity Series are biometric and use a one-to-one scan of an employee's finger to clock in and out - eliminating buddy punching. The V850 has the additional functionality of job costing and departmental transfers.

*V850 requires TimeForce Job Costing module.

V800 & V850 Rugged Edition

We've taken the nuts and bolts of the Velocity 800's and turned them into the hardest working clocks on terra firma. The Rugged Edition clocks are super tough, weather resistant and built to withstand drops up to 3 feet. The clocks are completely mobile, the batteries hold a charge for 12 hours and can be recharged using your vehicle power supply or a standard outlet - making the Rugged Edition clocks perfect for construction sites, industrial settings and outdoor environments.

*V850R requires TimeForce Job Costing module.

IQ1050/550 TimeClocks (1050 shown here with optional Biometric Reader)

The IQ series of time clocks is one of our most powerful and versatile. The IQ1050 can be ordered with biometric, magnetic, barcode, proximity and/or direct keypad readers and it sports a USB flash drive to download time punches if needed.

IQ1050

IQ200 TimeClock

This entry level IQ200 is perfect for small to midsized companies looking to perform primarily time and attendance only monitoring. It includes a USB port that allows for easy data transfer by USB flash drive.

IQ200

Whichever time collection device(s) you choose, iSolved TimeForce gathers your data, tracks all accruals and exceptions such as tardiness, absenteeism or abuse of break or meal periods. Everything integrates seamlessly. We have the solution for you.
