

## Workforce Scheduling.

Ensure seamless coverage to meet evolving requirements.

Effective workforce scheduling is vital to an organization's success. But incorporating a solution that keeps your business running smoothly does not just impact your bottom line—it impacts your people. Make work life easier for your employees, and it can pay off across every operational function.

As an enhancement to isolved Scheduling, isolved Workforce Scheduling allows you to quickly schedule employees as large groups or an entire organization. Quickly categorize employees, set schedules, communicate shift shortages and requirements, and predict future workforce needs—all within isolved People Cloud.

### Enable agility, predictability, and real-time communication.

With isolved Scheduling, you can set rules for assigning shifts across employees; determine who is responsible to work each shift; quickly view when employees are unavailable to work; notify employees when schedules are created; manage shift and coverage requests and more.

isolved Workforce Scheduling addresses even more complex requirements and allows you to:

- ✓ Set customizable values for how employees are counted per shift—number of work hours, occupancy percentage, number of beds
- ✓ Build staffing rules around employee count types and number needed per day
- ✓ Quickly add employees to shifts from a graphical scheduler view
- ✓ Assign employees directly to a shift versus a larger role
- ✓ Send notifications to employees who are eligible to fill open shifts
- ✓ Predict staffing requirements across employee groups and time periods

*Transforming employee experience for a better today and a better tomorrow.*

### Enjoy end-to-end scheduling within isolved People Cloud.

isolved Workforce Scheduling provides for the secure creation, management, and visibility of employee schedules within your existing isolved People Cloud experience. Let isolved Workforce Scheduling remove the confusion and complexity around staff coverage and allow you to focus on core business operations.

- Increase employee satisfaction and retention
- Provide an open employee communication platform
- Maintain compliance with local, state and federal labor laws
- Gain visibility on staffing challenges and opportunities
- Streamline manual scheduling processes
- Shift focus to value-added business operations
